

The book is 128 pages long, hard covered in a Smyth sewn binding. It features the history of the Tartan 37, beginning with a discussion of the two critical teams that made it happen - S&S and Tartan Yachts. Interviews were conducted with Olin Stephens and with Tartan 37 project manager Alan Gilbert, and they appear in the book. The evolution of the design is then presented, followed by a walk through the production process. Photo collages then describe the North American sailing areas where Tartan 37s may be found. The centerpiece of the book is a pictorial section with large format photos of Tartan 37s in beautiful settings. Finally, a look to the future includes Eric Freedman's magnificent rebuild of hull #252, and a discussion of the legacy left in the form of newer designs that still feature the Tartan 37 lines.

The celebration portion of the book is found in the owner commentary, provided by Tartan 37 sailors everywhere. Their love for these boats comes through in every word.

The appendix contains the full Tartan 37 specifications and the original cost sheet, plus the index and credits.

Line drawings from the files of Sparkman & Stephens and Tartan Yachts are used as chapter breaks throughout the book.
